

New York State Department of
Environmental Conservation

Division of Environmental Remediation, Bureau of Spill Prevention & Response
Region-1

Engineering Geologist 1

Hiring Window:

The position must be filled by June 19, 2006.

Job Description:

Engineering Geologists 1 are engaged in performing and supervising geologic and geophysical field survey work that involves various types of analysis (including rock cores, soil and aggregate samples), data interpretation, reports and the preparation of geologic reports of findings. Engineering Geologists 1 may perform and evaluate hydrogeologic, groundwater, water supply, solid waste and hazardous waste disposal site investigations and programs. Incumbents assist in field and laboratory analysis of complex geological problems and supervise the operation and maintenance of geophysical and geological test and survey equipment. Incumbents may also at times assist in the preparation and review of the geotechnical aspects of engineering and environmental investigations, reports, studies and expert testimony.

Job Qualifications:

A bachelor's degree including **60 semester credit hours** in the physical sciences and mathematics, at least **30 semester credits** of which must be in geology, engineering geology, hydrogeology, geological engineering or geophysics. In addition, you must have had two years of professional experience in geology. A master's degree in geology, geophysics, engineering geology, geological engineering or hydrogeology may be substituted for one year of professional experience. Education must have been received at a regionally accredited college or university, or one recognized by the New York State Education Department as following acceptable practices.

Salary:

The starting annual salary for an Engineering Geologist 1 is \$49,192.00 plus \$1,264.00 location pay.

Work Location:

The Engineering Geologist 1 position will be in the New York State Department of Environmental Conservation Region-1 office located in SUNY Building #40, Stony Brook, New York. The successful candidate will be a member of a remedial section in the Division of Environmental Remediation, Bureau of Spill Prevention & Response. As part of the oil spill response duties the candidate must drive a motor vehicle, carry equipment weighing up to 50 lbs., negotiate rough terrain, and be available for overtime work. The successful candidate must also complete health and safety program including annual medical monitoring, respirator fit testing, and OSHA training.

Promotional Opportunities:

Promotional opportunities are available through competitive examination and satisfactory service.

Application Procedures:

The position of Engineering Geologist 1 is usually filled through the use of eligible lists resulting from a written examination administered by the Department of Civil Service. However, it is likely that the eligible list for the Engineering Geologist 1 title at the Stony Brook office will be exhausted. Therefore, the position will likely be open to all qualified individuals who apply by submitting their curriculum vitae to the Regional Spill Engineer, New York State Department of Environmental Conservation, SUNY Building #40, Stony Brook, New York 11790-2356 prior to May 22, 2006. For additional information, contact Mr. Joseph E. Haas II via telephone at (631)-444-0332 or via e-mail at jehaas@gw.dec.state.ny.us
